

# Weekly Update by Mark Armstrong

## - March 22, 2024

Greetings from Tyler,

Having just written the monthly letter, the realization struck me that nothing had been said about [the war in Ukraine](#). We're not hearing much. [I wonder why](#).

The big peace deal to stop the war in Gaza officially fell apart. But there's no shortage of criticism about how the IDF is doing its job. [It seems that an area is never really cleared](#). They've got tunnels running for miles, as you've heard. The terrorists keep appearing in areas already cleared. Maybe that was part of the strategy. It must have cost a lot to dig all those tunnels, and where do you think the money came from? You don't suppose humanitarian aid has been used?

The pretender [has fallen out of love with the Israeli Prime Minister](#). There have been years of accusations and court cases, almost like we're seeing here with Donald Trump, against Netanyahu.

Since October 7, things have gotten serious. The relationship has soured, and our fake president is angry. It's made him almost as mad as he is at people who think he's too old to be president. But the liberal media is on his side. They're mad at Netanyahu too! Oh well. They say Biden is done playing nice with Netanyahu. What's he going to do? [Cut off the money?](#)

[Haiti is a disaster](#). The news is talking about a total collapse as if it hasn't already happened. The gangs have take over, and there are bodies all over the place.

[Maybe you've seen what happened in El Paso](#). There's been a breach of the razor wire, probably by cartel members, to let hundreds clamor in on foot. They are already sleeping on the streets down there, and you might not have a heart if you stop them from stealing.

Did European governments consult Al Gore before making assurances to get rid of the tractors? This global warming belief is wearing a little thin. [European governments know they can't survive if the farmers stop farming](#). What is everybody supposed to do, eat or save the planet? The mainstream media takes it

as doctrine. The mantra about global warming appears in nearly every nature documentary. It must be a requirement.

It no longer seems that the government is on our side. There's more trouble around the world than we could have imagined in only three years. It seems like Americans are not listening to the higher powers. Who do we think we are?

Maybe it would be different if they hadn't flim-flammed us so many times. The medical community has virtually destroyed itself over Covid 19. They've got a lesbian doing the [White House press conferences](#). If our nation continues to mock God and His Commandments, we'll turn into Haiti in no time. If you can't recognize God's hand in history, and in the formation of the United States you're not looking. Mark
